

Headmaster's Speech

Welcome to the state of the art educational centre which offers holistic education to primary school students irrespective of denominational affiliation, colour, race or creed. Our thrust is to help students to be competitive in nature especially when we look at the professional and business environments surrounding us. Regards will therefore be given to the academic, sporting, cultural, artistic and practical aspects where by emphasis will be on working hard. This goes along with the school motto Vincit Qui Patitur implying He who Perseveres Conquers .

I personally would like to invite all prospective parents and students to visit the school at any given time.

Thank you
